

Engineer Your Future - Engineering as a Worldwide Profession

**“Global Marathon For, By and About Women in
Engineering”**

March 23-24, 2006

**Annie Huang, P Eng
Tyco Electronics Canada**

Overview

- Globalization of engineering
- Sell personality: a foreign-trained women engineer
- Challenge oneself
- Engineer our future - women engineers
- Engineering as a worldwide profession

Globalization of Engineering

- The playing field is being leveled.
- Sharing information, tools, software easily available to apply knowledge.
- Migration of engineers.
- The situation is challenging.

Sell personality:

- A foreign-trained women engineer: from China to Canada
- Hard skill: Math, Science and Engineering Fundamentals;
- Soft skill: open-minded, persistent and confident;
- Sell personality in a new professional environment: knowing the playing field.

Challenge oneself

- Brave to take initiative;
- Build up good imagination;
- Join the innovation fray;
- Acknowledge of dedication, sacrifice and determination.

Engineer our future - women engineers

- Don't sell ourselves short;
- Don't be emotional, use our brain: sometimes emotions can deceive us; listen to what our heads tell us is right.
- We're innovative, intellectual and beautiful!

Engineering as a worldwide profession

- World-wide opportunities: empowering individuals.
- Globalization: fitting into the global competition, opportunities and collaborate with others globally.
- Having vision.
