

## Dr Emma Wyatt Shell

BSc and PhD in Chemistry, worked in the pharmaceutical industry for one year and have now been with Shell for 3 years. I have three years experience (as part of my PhD) running tutorials, demonstrating experiments and supporting undergraduate students in running their own weekly experiments and longer summer projects. Since being at Shell I have had two students on 2 week work experience placements

I am Components Scientist within the Lubricants Technology department. I work with product developers and our suppliers to ensure the chemistry & quality of the components we are purchasing is fit for purpose. I also project manage large changes to our portfolio of components, e.g. following global tender processes, and am responsible for programme management of the R&D programme associated with the introduction of GTL in lubricants
