

Marathon, INDIA

Mr.Venkata Subba Rao, is an internationally acclaimed genius in mathematics. Although an electrical engineer by profession he made his foray into teaching by accident and today has enriched the teaching community with his pioneering work in Indian mathematics.

He has made rediscovering ancient Indian mathematics and correlating it relevantly to modern day math. His experience in the industry and his passion for mathematics has created in him a zeal for making mathematics- simple, fun and definitely creative. He is the originator of VYASA Learning Programme a unique package of creative modules that aims at making math appealing and interesting to all.
